

BESPOKE ARCHITECTURAL ELEMENTS

The Art of *Sculptural Surface*

LOOKBOOK - 2026

STUDIO LUMINANT

— OUR PHILOSOPHY

Matte cast relief, *read by light.*

Studio Luminant designs and casts bespoke architectural relief panels and sculptural surfaces for the world's most considered interiors. Depth — not colour, not print — is the product: every surface is a dimensional plaster relief revealed by a single grazing light.

Each piece is born from our AI-Assisted Product Modelling process, cast in proprietary materials, and finished by hand — bridging centuries of craft tradition with computational precision.

STUDIO LUMINANT

— IN DETAIL

Depth, *read by light*

Presented first as a neutral white sculptural object — geometry pure, no distraction. A single raking light skims the relief, and the surface comes alive in shadow. Honest cast grain and hand-made irregularity are part of the language.

Surfaces in Context

Wave Relief — Luxury Lounge

LUMINA PMAG™ · FULL-HEIGHT FEATURE

Petal Geometric — Luminant Lounge

LUMINA PMAG™ • IMMERSIVE WRAP

A photograph of a modern grand lobby. The left wall is covered in a grid of circular, ribbed, golden-brown panels. The floor is a polished, speckled terrazzo. A large window on the right side offers a view of a city skyline. A small table with a white orchid plant is in the foreground on the right.

Circular Geometric — Grand Lobby

LUMINA PMAG™ · BESPOKE COMMISSION

Star Relief — Luxury Interior

LUMINA PMAG™ · GOLD-ACCENT FINISH

Engineered for *permanence*

Two proprietary material systems — each optimised for specific performance, both delivering exceptional surface quality and depth.

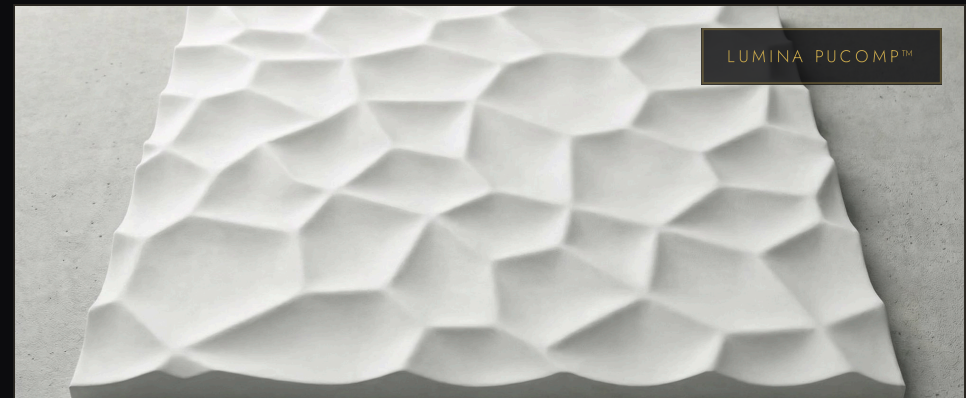

Lumina PMAG™

POLYMER MODIFIED ALPHA GYPSUM

Our flagship material — polymer-reinforced alpha gypsum with the aesthetic richness of carved stone and superior dimensional stability. The preferred specification for lobbies, corridors, and high-traffic public spaces.

SURFACE Ceramic-Like Smooth	APPLICATION Interior Walls & Ceilings
FINISH Artisan Finishes	FORMAT Modular & Bespoke

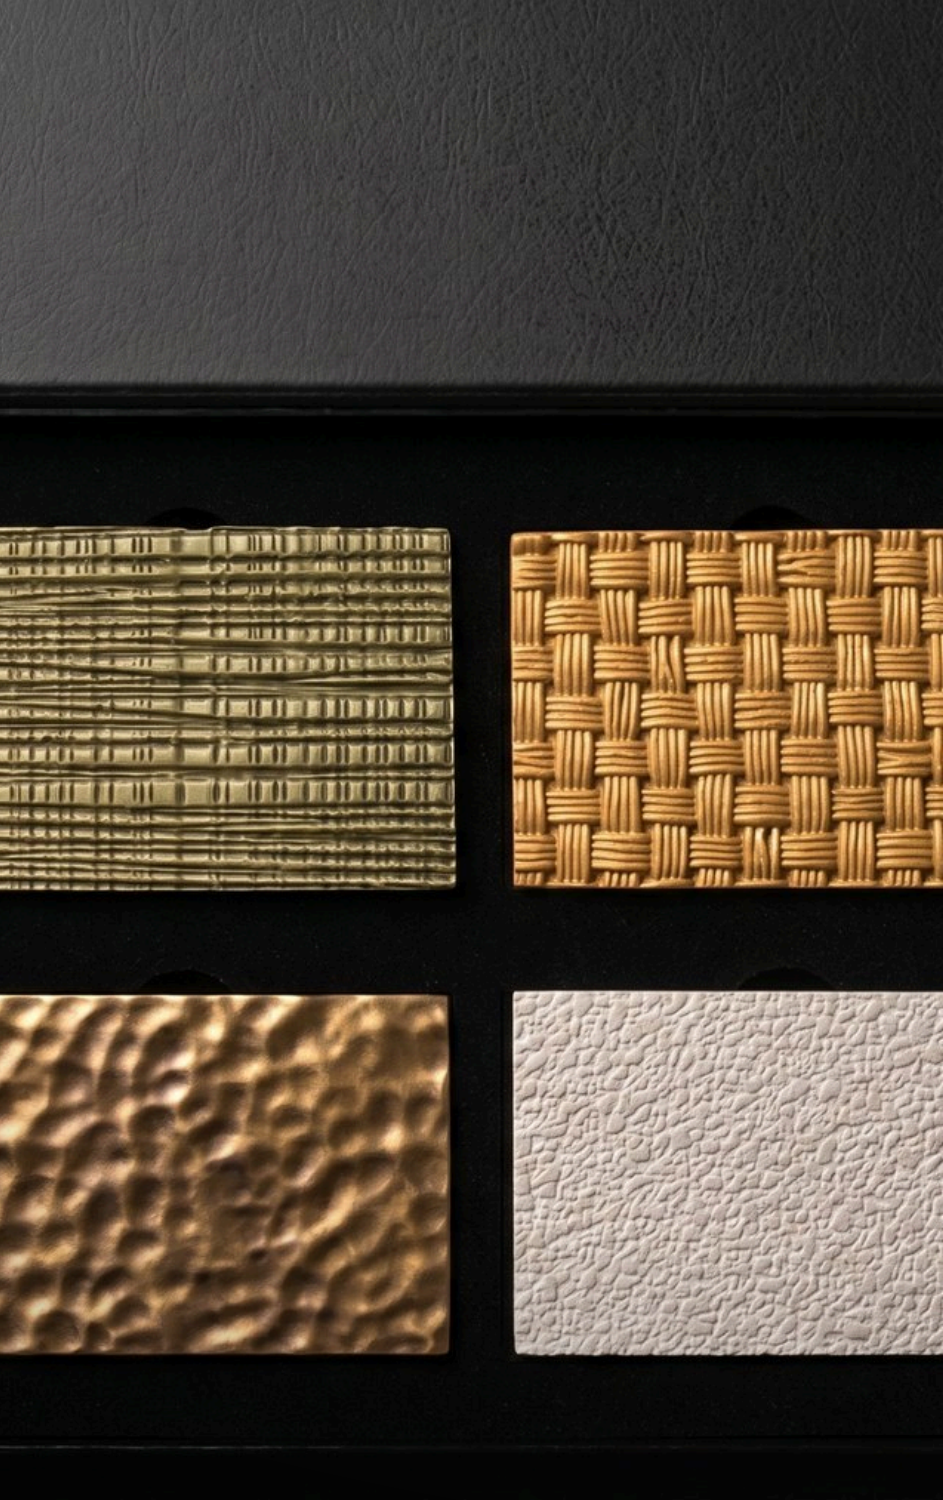

Lumina PUCOMP™

PUCOMP™ COMPOSITE

A high-performance PUCOMP™ composite for applications where PMAG is unsuitable — exterior cladding, wet areas, and complex three-dimensional geometries. Significantly lighter, enabling intricate forms and large spans, finished to the same artisan standard.

WEIGHT Lightweight	APPLICATION Exterior & Wet Areas
GEOMETRY Complex Spatial Forms	DURABILITY Impact & UV Resistant

— ARTISAN FINISHES

Four finishes, *one surface language*

A shared vocabulary of hand-applied finishes — specified by where the surface lives.

Canvas	PAINT-READY	<i>"Yours to finish."</i>
Veil	NATURAL · DRY INTERIOR	<i>"Lets the surface speak."</i>
Grit	PERFORMANCE · HOSPITALITY	<i>"Built for the room that never sleeps."</i>
Tide	WET-ZONE · F&B · SPA	<i>"Steady through every spill and splash."</i>

Specified per project · Bespoke colour-matching available on request.

Architecture you can feel.

Bespoke architectural elements.

Designed and cast to order — wall reliefs, installations, façade detail, and heritage restoration. One studio, from drawing to delivered surface.

STUDIO LUMINANT

— THE REAL QUESTION

You've specified
something *ambitious*.

The question was never whether it could be drawn. It's whether it survives production — arriving on site as crisp, as deep, and as considered as the render promised.

— OUR ANSWER

We make the thing that
matches the drawing.

—

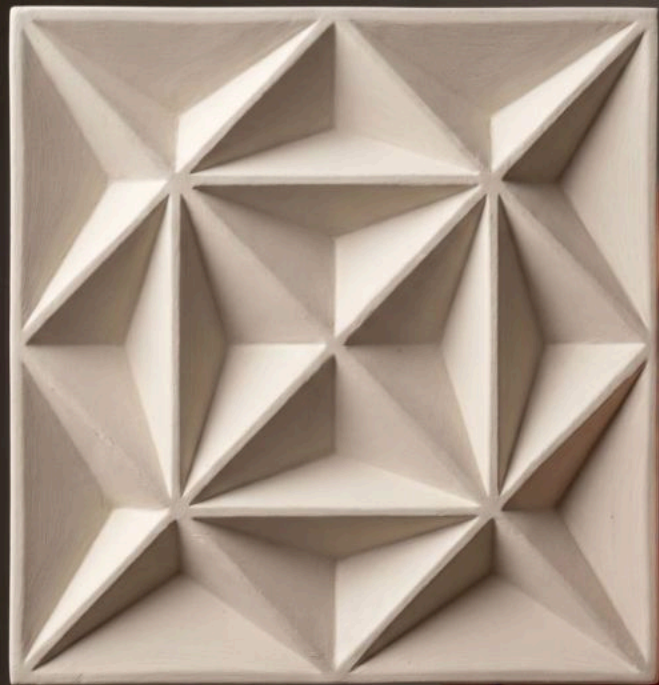

Every Studio Luminant element is designed, modelled, and cast under one roof — so what you specify is what ships. No flattening. No "close enough."

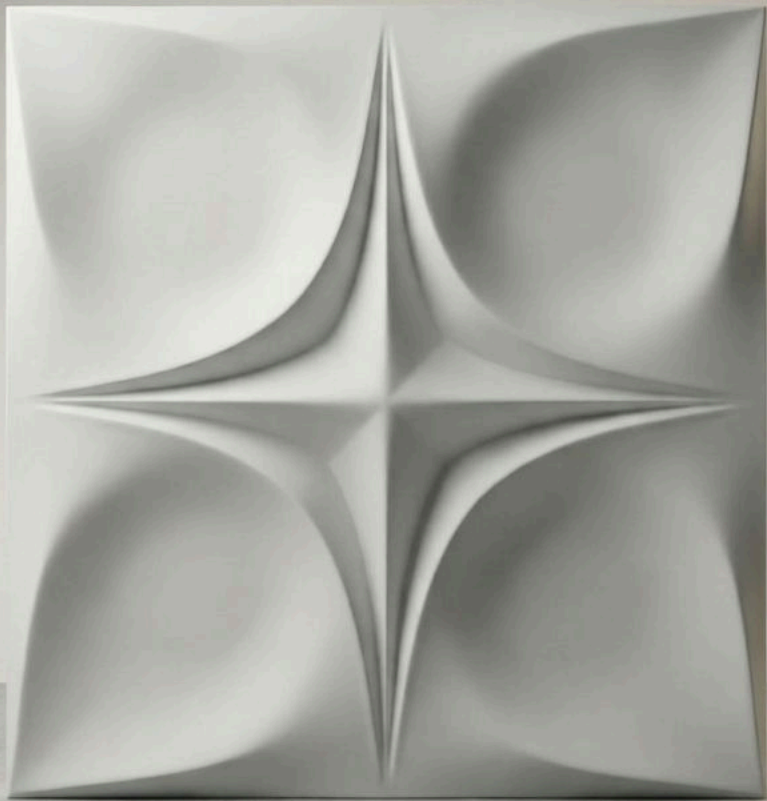

— PROOF, NOT RENDER

Depth you can read across a room.

—
Cast relief, hand-finished — and photographed
exactly as it leaves the studio. The surface you specify
is the surface that arrives.

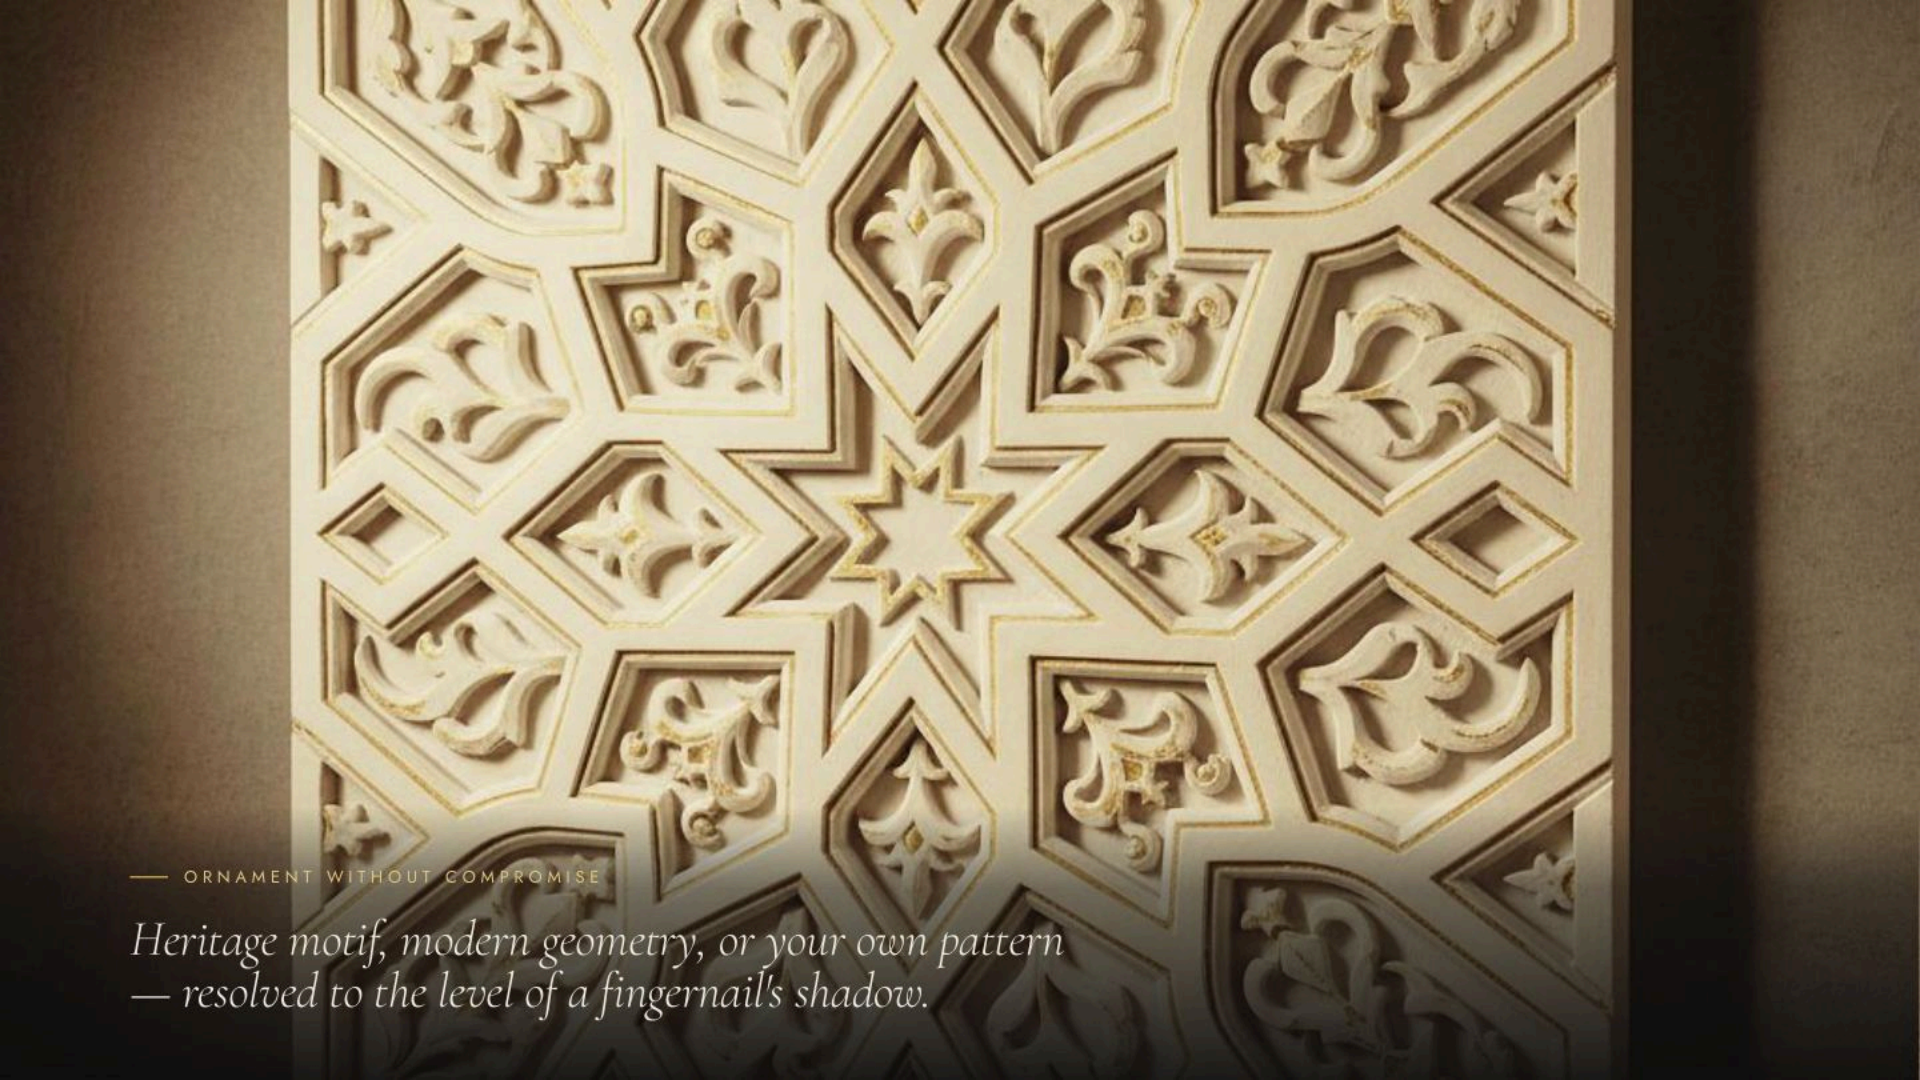

Actual cast sample — not a visualization.

— TWO MATERIALS · ANY FORM

From tight geometry to flowing *relief*.

Our PMAG™ and PUCOMP™ systems hold detail from a crisp two-millimetre chamfer to a sweeping curve — cast to the edge, panel after panel.

— ORNAMENT WITHOUT COMPROMISE

*Heritage motif, modern geometry, or your own pattern
— resolved to the level of a fingernail's shadow.*

From vision *to execution.*

One pipeline — one roof.
No hand-offs to lose detail.

01

Design

Your intent, translated into a buildable relief.

02

Modelling

Digital and physical prototypes before anything is cast.

03

Moulding

Precision tooling for repeatable, crisp detail.

04

Casting

PMAG™ / PUCOMP™ poured to spec, panel by panel.

05

Artisan Finish

Hand-finished surface, signed off to your sample.

— HOW WE PROTECT THE PROJECT

Nothing left to a handshake.

01

Scoped & contracted

Every project is documented and contracted before a mould is cut.

02

Approved in writing

Drawings and samples signed off — no verbal change orders, ever.

03

Gated milestones

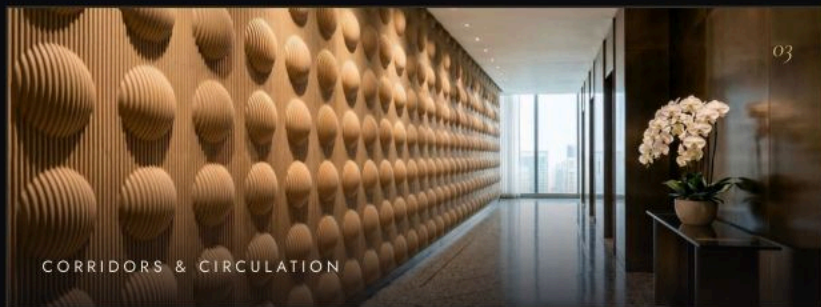

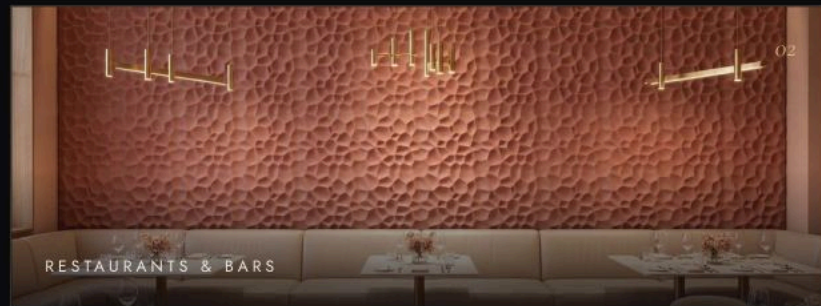

Checkpoints surface surprises early, not on site.

We're not the fastest to say yes. We're the ones who deliver what was agreed.

— RANGE

Walls are only the beginning.

If it can be moulded and cast, it can carry your design — at any scale.

— FOR THE ARCHITECT

Your vision, *uncompromised.*

We work to your intent, not a catalogue. Bespoke pattern, bespoke scale, bespoke finish — engineered so value-engineering never has to touch your design.

ARCHITECT DEVELOPER FF&E

Not a catalogue. *A collaborator.*

OFF-THE-SHELF PANELS

Looks specified.

- Fixed catalogue patterns — your intent adapts to what exists
- Visible seams repeat across wide spans
- Generic factory finish, batch-colour matched
- Panel dimensions fixed by existing moulds
- Value-engineering compromises the design intent
- No single point of contact from drawing to delivery

VS

STUDIO LUMINANT

Looks commissioned.

- ◆ Your pattern, your scale — drawn from your intent
- ◆ One seamless composition across any span
- ◆ Artisan finish hand-resolved to approved sample
- ◆ Custom panel dimensions, cast to order every time
- ◆ Engineered so value-engineering never touches the design
- ◆ One studio — from drawing to delivered surface

The difference isn't a price line — it's whether the room still looks designed five years from now.

— ONE REQUEST

Hold the finishes
before you decide
anything.

We'll send you a Studio Luminant sample box — four
artisan finishes, cast and hand-finished, yours to keep.
No cost. No commitment.
